

## **We are autonomous Mobile Machines. You can be part of our team as**

### **IT and network administrator (m/w/d)**

Do you have experience in system and network administration of LINUX Systems? Are you looking for a future oriented long term employment?

Our young and creative team has already realized several world innovations in the area of autonomous and electric mobile machines: Currently we are automating driverless trucks for use in mixed traffic on private ground, we are unique in electrically driven and fully automated "trains on rubber tires", which are running on a "virtual rail" and we produce safety certified radio remote controls for heavy VOLVO trucks.

Our company group consists of two locations in Ladbergen (D) and Wroclaw (PL) using a complex networked IT infrastructure. In addition we offer network based solutions and remote access for our customers.

Ideally you come with well proven knowledgs and experience in the following areas:

- Server – System administration in LINUX
- Ethernet Network administration (LINUX and OpenWRT)
- Email and Web-Server – Administration
- OpenVPN
- WLAN and Network Security
- Windows-Client - Systems

Your tasks:

- To assure the IT operations in our companies
- Setup and configuration of LINUX-Servers and Clients (also Windows Clients)
- Definition of IT and network infrastructures in customer projects

English language is essential as we are working in an international environment. Our company language is English.

We are looking forward to get in touch with you! Your direct contact is Mr. Christoph Mueller. Please contact us by email: [sekretariat-1@mobiletronics.net](mailto:sekretariat-1@mobiletronics.net)
